

G & W Group, Inc.
d.b.a. Airport Shell

June 20, 2006

To Whom It May Concern:

It seems to Good to be True! Yes, that's what I thought when I first saw Total Energy Concepts, Inc. product. It has now been over three years since we installed the TEC Energy Management and Power Optimization System in my Shell Station/Convenience store. The system has performed just as I was told. The protection from surges alone has helped to lower our maintenance cost on refrigeration, lights, and our pumps, not to mention that our electric savings has exceeded 20% over these three years. Thank you for introducing us to The Energy Management System and TEC's on going commitment to service and satisfaction. I would recommend Total Energy Concepts, Inc. to every business owner.

Sincerely,

Wilson DeCastro
