To Whom It May Concern:

The intention of this letter is to share the utility cost savings that TEC Energy Management System has created my business since it's installation in September 2003.

I am sure many business people have the same questions that I had with Chuck when he initially approached me. I have been told many things by many sales people over the years. This has created a very skeptical and wary person. After several discussions with Chuck and other businesses that had seen cost savings since their installations I decided to give TEC Energy Management System a chance.

Several months had passed without much savings on my utility bills. At that time, I decided to go to Florida Power to get their thoughts on this system. I was able to talk to a customer service manager with Florida Power that was happy to inform me of a decrease in power usages of over 20% from the previous year! The reason I did not see the savings on our actual bills was due to several increases from the power company in recent months. I was, in fact, obtaining the savings that Chuck had promised from the very beginning.

Please feel free to contact me to verify my letter. I am sure anyone would be thrilled to save up to 20% on their utility bills.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott C. Casselberry".
