Detroit Lakes, MN 56501

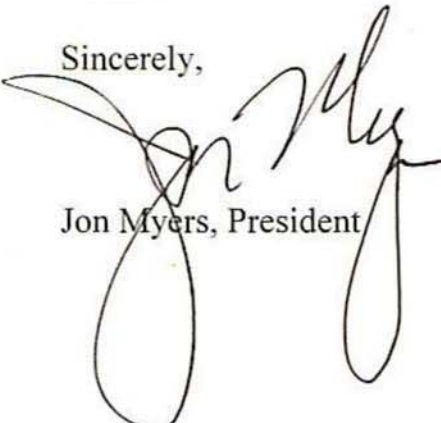

To Whom It May Concern:

I just wanted to drop you a line and tell you how pleased I am with the results of the TEC Energy Management System that your company installed at our dealership. The system works as represented and we have seen a significant reduction in our energy consumption, 20% over the last 2 ½ years

The protection alone for our sensitive equipment, especially my lighting in our lots has saved a tremendous amount on other maintenance expenses caused by power surges and lightning strikes, namely the replacement of lights. Far greater of an advantage to us, is the monitoring of the system by Chuck Bain and TEC and the service they provide.

I am glad to say that I am very comfortable in recommending this to anyone who might be interested.

Sincerely,

Jon Myers, President
